

ADVANCED BEGINNER SKILLS

Mary Ammerman, PsyD, BCN

2-1/2 day Course

18 CEs - Psychologists ~ 18 contact hours - Counselors

This is a follow-up course to the 4-day Neurofeedback in a Clinical Practice course.

We will review and elaborate key points of the introductory 4-day course, with an emphasis on hands-on application (bring your own system, or one can be provided). The goal of this course is to increase your confidence as a neurofeedback provider in the following areas:

- Selecting appropriate training protocols based on the combination of client symptoms and EEG data
- Correctly locating 10-20 sites
- Understanding how data on the therapist screen reflects your clients' inner experiences as they train
- Identifying when and how you should adjust protocols based on your clients' responses to training
- Effective coaching strategies
- We will also have extensive time available for Q & A so that you have a chance to ask your most pressing neurofeedback questions.

Limit 8 attendees ~ Register soon!

Mary Ammerman, PsyD, BCN earned her doctorate in clinical psychology from Pepperdine University. Since 2006, she has combined neurofeedback training with talk therapy in her work with clients. Mary became board certified in neurofeedback in 2012 and has been teaching the practicum section of Dr. Ed Hamlin's introductory Neurofeedback in a Clinical Practice course since 2013. She mentors beginning neurofeedback providers across the United States and Canada. The clinicians she mentors have commented on her ability to explain complicated concepts in clear and simple language, using humor and every day analogies.
